Education

Bapuji Institute of Engineering and Technology (Aug 2019 – June 2023) - BE in Computer Science and Engineering (CGPA 8.02)

Experience

Product Engineer, TCS (June 2024 – Present)

- Developed and maintained 3 key modules for a US-based client using Ruby on Rails, delivering end-to-end web application features and enhancements.
- Built and implemented client requirements using Ruby, Ruby on Rails, **HTML**, **CSS**, **JavaScript**, and **Rake** tasks to automate business processes and scheduled operations.
- Designed and maintained **RESTful APIs** to support web applications and mobile app functionalities. (**Ruby**, **Ruby on Rails**)

Software Engineer, Meta16 Labs (Sept 2023 – Feb 2024)

- Contributed to the development of a healthcare digitization platform using **React.js** and **MongoDB**, supporting hospitals and diagnostic centers.
- Led end-to-end implementation, system integration, client onboarding, and data migration for healthcare organizations across Karnataka.

Projects

Shree Spice Kitchen Cart – React E-commerce Cart (<https://shreespice-kitchen-cart.vercel.app/>)

React.js, Tailwind CSS, Vite, Client-Side Cart Logic, Vercel

- Built a responsive React e-commerce cart interface to browse products and manage selections.
- Implemented add/remove and quantity adjust functionality with dynamic cart state and real-time total calculation.
- Applied mobile-first responsive UI with Tailwind CSS for consistent experience across devices.
- Managed cart state using React state/hooks (useState/useReducer or Context API) for predictable UI updates.

Dixit Offset Printers – React Business Website (<https://dixit-offset-printers.vercel.app/>)

React.js, Vite, Tailwind CSS, Vercel

- Built a responsive React SPA for a legacy printing business to establish online presence.
- Developed modular, reusable components and modern UI using Tailwind CSS.
- Implemented client-side routing and smooth navigation for improved user experience.

JobSpark AI – AI Resume Analyser(<https://job-spark-ai-91.vercel.app/>)

React.js, JavaScript, AI Integration, Tailwind CSS, Vercel

- Developed an AI-powered job assistance platform to support job search and career-related workflows.
- Integrated AI-based features to provide intelligent user interactions and personalized responses.
- Designed and implemented responsive user interfaces using React.js and modern frontend development practices.

Tools and Technologies

Languages: Ruby, Ruby on Rails, Artificial Intelligence, RAG Systems, Multi- Agent RAG, React.js , HTML, Tailwind CSS, JavaScript, MySQL, Jenkins, Vercel, Postman API, Flask, BrowserStack, Vite
