SUMMARY

Full Stack Software Engineer with hands-on Angular experience building responsive, component-based UIs across two production platforms, plus Python backend development integrating LLM models for AI Compass. Comfortable working independently within agile teams, integrating front-end components with RESTful APIs, and using Git for version control. Led a multi-agent RAG system to a first-place, company-wide hackathon win.

TECHNICAL SKILLS

Frontend: Angular, RxJS, TypeScript, Component-Based Architecture, React.js, Next.js, HTML, CSS, Tailwind CSS, Vite

Backend & APIs: Ruby on Rails, RESTful API Design, Microservices, ActiveRecord, API Authentication, Query Optimization

Languages: TypeScript, Python, Ruby, JavaScript, HTML, CSS, SQL

Databases & Data Modeling: PostgreSQL, MySQL, MongoDB, Schema & Data Modeling

AI: LLM Integration, RAG Systems, Multi-Agent RAG, Google Gemini API, Prompt Engineering

Testing & Tools: Playwright, Postman, BrowserStack, Git, Jenkins, Vercel

EXPERIENCE

TCS

Full Stack Developer — AI Compass

Sept 2026 – Present

- Building AI Compass end-to-end — Angular/TypeScript front end and Python backend APIs integrating LLM models, with PostgreSQL for data storage — delivering AI-driven use cases for BFSI (banking) clients under a cloud-first, agile approach.

Product Engineer — TCS iON

June 2024 – Sept 2026

- Promoted from Associate Systems Engineer to Systems Engineer in recognition of technical contributions and ownership.
- Built the Angular front end for the Xerox Learning Exchange Platform, managing state with RxJS, writing automated tests with Jasmine/Karma and Playwright, and troubleshooting cross-browser issues across Android and iOS/Safari.
- Developed and maintained 49 production REST APIs for the Xerox Learning Exchange Platform using Ruby on Rails, implementing custom API authentication and powering Android and iOS applications used by 50,000+ learners.
- Designed 23 APIs for the Content Player module (playback, thumbnails, media management) and 27 APIs for the Learn to Grow mobile application, optimizing database queries through indexing and N+1 resolution to improve response performance.
- Handled cross-platform file and media support for PDF, video, audio, image, and document content, owning API design decisions across modules.

Multi-Agent RAG System — TCS AI Friday Hackathon

1st Place, Company-wide

- Led a team to design and build a multi-agent Retrieval-Augmented Generation system, owning the technical architecture and presentation to win first place among company-wide submissions.

Software Engineer (Intern) | Meta16 Labs

Sept 2023 – Feb 2024

- Built features for a healthcare digitization platform using React.js and MongoDB, leading end-to-end implementation, client onboarding, and data migration for healthcare organizations across Karnataka.

PROJECTS

JobSpark AI — AI Career Intelligence Platform ([live demo](#))

- Built an AI-powered platform integrating the Google Gemini API to analyze resumes, score ATS/job-fit compatibility, and generate personalized optimization suggestions, using React, TypeScript, and Vite, deployed on Vercel.

Dixit Offset Printers ([live demo](#)) — Business website built with React.js, Next.js, and Tailwind CSS, featuring live Google reviews and SEO optimization, deployed on Vercel.

CERTIFICATIONS

- Claude Certified Architect — Foundations, Anthropic (Oct 2026); Claude Certified Developer — Foundations (Aug 2026)
- AWS Certified Developer — Associate, Amazon Web Services (Oct 2025)
- Oracle Cloud Infrastructure 2025 Generative AI Professional Certification, Oracle

EDUCATION

Bapuji Institute of Engineering and Technology — B.E. in Computer Science and Engineering

Aug 2019 – June 2023
